Jungle Jim's CAMPING & TRAVEL LIST

DESTINATION & DATE

This list was originally designed in 1971 to categorize the items to be contained in specific bags and boxes that would fit into a small Jeep CJ-2A. Over the years, other items found their way onto the list so that it would also be useful in planning air travel and road trips. For example, the bold items might be taken on a road trip in a car with hotel stays. Obviously, it would not make sense to take all of these items on any particular excursion. Consider the geography, season and temperature range, terrain, mode of transportation, length of stay, and nomadic attributes of a particular outing. Highlight the items you anticipate needing. Check the boxes as you load up. Or, as most have, feel free to use this as input as you create your own list.
